Career Profile

- Results-driven **Software Engineer** with **3 years of experience** building scalable, production-ready web and mobile applications for international clients across **SaaS, real estate, and social** platforms.
- Strong background in **clean architecture**, multi-tenant SaaS platforms, real-time systems, and end-to-end delivery from requirement gathering through to production.
- Skilled in direct **client communication** — gathering requirements, presenting demos, and delivering progress updates across time zones.
- Leverage AI-powered development tools (**Claude Code, Cursor**) with effective **prompt engineering** to accelerate development and ship high-quality features faster.

Core Competencies

Languages JavaScript, TypeScript, Python, C++, SQL

Frontend React.js, React Native, Next.js, Tailwind CSS, HTML/CSS

Backend Node.js, NestJS, Express.js

Database MongoDB, PostgreSQL, Firebase, Supabase

Cloud & DevOps AWS, Firebase (FCM, Auth, Firestore), Docker, Git/GitHub, CI/CD

AI Development Claude Code, Cursor, Prompt Engineering, RAG Pipelines, Vector Databases, LLM API Integration

Tools & Soft Skills Jira, Trello, ClickUp, Postman, Socket.io, Client Communication, Agile/Scrum, Remote Teamwork

Professional Experience

Techtimize

Lahore, Pakistan

SOFTWARE ENGINEER

Oct 2025 – Present

- Develop and maintain full-stack web applications using **React.js, Next.js, and Node.js** for production-level business clients, including microservices-based backends with **NestJS and PostgreSQL** deployed on **AWS**.
- Build responsive, component-driven interfaces with **RESTful APIs**, authentication, admin panels, **role-based access control**, and payment gateway integrations including **Stripe**.
- Accelerate development velocity using AI-assisted tools such as **Claude Code and Cursor**, applying structured **prompt engineering** to deliver features faster while maintaining code quality.
- Communicate directly with clients to gather requirements, present demos, and provide progress updates, translating business needs into reliable technical solutions.

360HR

Remote

MERN STACK DEVELOPER

Aug 2023 – Jan 2026

- Led end-to-end development of an enterprise job portal and **applicant tracking system (ATS)** using the **MERN stack**, building high-performance React.js interfaces for job posting, candidate search, applicant pipelines, and recruiter analytics.
- Designed **RESTful APIs** with Node.js and Express.js for job workflows, applications, and notifications, secured with **JWT-based role-based access** for admins, recruiters, and applicants.
- Optimized **MongoDB schemas, aggregation pipelines, and indexing** strategies for fast search and filtering across large candidate datasets, and integrated email notifications, resume uploads, and reporting tools.
- Communicated directly with international clients and stakeholders, leading requirement discussions, sprint demos, and status updates while delivering features in agile sprints.

- Developed and maintained a production **React Native** social app with location-based discovery, **real-time chat**, friend management, user profiles, and event workflows.
- Built a scalable real-time chat module using **Socket.io** with reliable message delivery, presence tracking, and low-latency communication, and integrated RESTful APIs for app features, user data, and events.
- Engineered the backend with **Node.js** and a **MongoDB** database, building a reels-based feature for jobs that lets users discover and apply to opportunities through short-form video feeds, with optimized queries and scalable APIs.

Projects

Entry Club - Multi-Tenant Web & Mobile Platform Architected a **multi-tenant** web and mobile platform using Next.js with loosely coupled, microservice-ready modules. Integrated **Meta APIs, Google APIs, OAuth**, push notifications, analytics, and payment gateways, and built high-performance backend services and reusable component libraries supporting **thousands of concurrent users**. **Skills : Next.js, NestJS, Mobile Apps, OAuth, Payment Gateways.**

iShout.ae - Influencer Marketing & Brand Collaboration Platform Led development of an influencer marketing platform enabling businesses to discover, manage, and collaborate with content creators through a streamlined digital ecosystem. Designed scalable **REST APIs**, campaign management workflows, creator onboarding, analytics dashboards, and role-based access controls, optimizing performance through **SSR, caching, database tuning, and CI/CD** pipelines across Dev, Staging, and Production. **Skills : Next.js, Python, REST APIs, SSR, CI/CD.**

Tawabiq - Real Estate Platform Built a comprehensive **broker management system** covering properties, leads, communications, appointments, commission tracking, and transactions with advanced search, geolocation, and role-based permissions; a modern real estate marketplace with saved searches, favorites, recommendations, and map-based search; and an enterprise-grade **admin system** for users, brokers, listings, approvals, and content moderation with reporting dashboards and audit logs. **Skills : Next.js, Python, PostgreSQL, SSR, Geolocation.**

Vumi - Cross-Platform Mobile Application Developed a cross-platform **React Native** app delivering a native-like experience on iOS and Android, with authentication, dynamic content feeds, user profiles, and push notifications using **Firebase (FCM, Auth)**, and optimized performance with efficient list rendering, lazy loading, and state management. **Skills : React Native, Firebase, REST APIs.**

AI Calling Bot - Voice Automation with RAG Built an AI-powered calling bot in **Python** handling automated voice conversations using speech-to-text and text-to-speech pipelines, with a **Retrieval-Augmented Generation (RAG)** pipeline (vector database and embedding-based semantic search) for real-time context retrieval, **LLM API integration**, conversation state management, and fallback handling. **Skills : Python, RAG, Vector DB, LLM APIs, STT/TTS.**

French Riviera Travel - Travel & Destination Platform Worked on a travel content platform featuring destination guides, attractions, blogs, and accommodation content, building responsive pages and improved navigation for a production-ready travel discovery experience. **Skills : Next.js, Responsive UI.**

Instant Custom Boxes - E-commerce / Custom Packaging Developed responsive website sections including product categories, quote request flows, and landing pages, improving the browsing, customization, and inquiry-based ordering experience. **Skills : React.js, Responsive UI.**

Bitrix24-Based CRM - Workflow Management Platform Contributed to CRM modules including task management, collaboration tools, user roles, reporting, and workflow automation, with scalable admin and business management interfaces. **Skills : Bitrix24, CRM, Workflow Automation.**

T-Mobile - Real-Time Collaboration Tool Contributed to a real-time collaborative task management application with live synchronization, multi-user support, and role-based access control. **Skills : React.js, Node.js, Real-Time Sync.**
