EXPERIENCE

Euphoria XR — FullStack Developer

June 2024 – PRESENT

Contributing to innovative web and mobile applications with a focus on scalable, user-centric solutions. Key highlights include:

Vumi Mobile App (React Native , Node js , Mango DB)

- Architected and implemented intuitive swipe functionality in React Native, significantly enhancing user experience and engagement across mobile platforms.
- Designed and deployed real-time push notifications using Firebase Cloud Messaging, ensuring seamless and timely user communication.
- Engineered a robust chat module with Socket.io, seamlessly integrating frontend (React Native) and backend (Node.js) logic for real-time, bidirectional communication.

- Developed a comprehensive event management system, enabling efficient creation, updating, and tracking of events with a focus on scalability and usability.
- Crafted and optimized RESTful APIs in Node.js to support critical features like chat, event management, and user interactions, improving system performance.
- Leveraged MongoDB with geospatial queries to implement location-based features, enabling users to discover nearby events and connections efficiently.
- Implemented secure, scalable authentication systems using OAuth and JWT, ensuring robust access control and data security.
- Ensured seamless real-time data synchronization through Socket.io, enhancing dynamic user interactions and application responsiveness.
- Implemented social login integrations including Google, Apple, and LinkedIn authentication using OAuth 2.0 in a React Native application. Developed secure backend authentication flows with Node.js and managed user data in MongoDB for seamless user onboarding.

AI Chabot and Voice CallingBot (Python , Django , AWS , RAG , Vector Db)

- Developed an AI-powered chatbot using Python, Django, and AWS, enabling real-time conversational interaction.
- Integrated Retrieval-Augmented Generation (RAG) and Vector DB for accurate, context-aware responses from custom datasets.
- Built voice calling functionality with speech-to-text and text-to-speech, allowing natural voice-based communication.

360HR, Remote - Software Engineer

July 2023 - Aug 2024

- Led development of scalable Job Posting Website, optimizing responsive design and state management to enhance user experience and system reliability
- Built and maintained robust Node.js RESTful APIs, ensuring seamless user management, workflows, and real-time data processing.
- Crafted sleek, high-performance React interfaces that delivered a fast, intuitive, and visually engaging front-end experience
- Collaborated with the team on software projects and debugging.

T- Mobile, Remote – Web Developer

June 2022 - Aug 2023

- Developed and optimized web tools using React and Node js
- Improved user Experience across platform
- Collaborated with cross functional team to deliver cutting-edge web solutions

EDUCATION

University of Lahore

Bachelor of Science - BS, Computer Science

September 2020 - July 2024

SKILLS

Programming Languages

JavaScript, Typescript, Python, C++ , SQL

Libraries & Frameworks

React, React Native , Node.js, (EXPRESS), Tailwind, CSS , MongoDB , Firebase , Postgress

Tools & Platforms

Git, GitHub, Docker, Firebase, AWS, Jira, Trello

Soft Skills:

Problem Solving, Time Management , Communication , Team Collaboration

Live Projects:

Task Manager: Real -time collaboration app

360HR **:** Advanced Job Website
